Summary

Frontend-developer with 3 and a half years of study-related and project-based experience. Shifted from sales to programming to build a career in tech.

Technical Skills

Languages: JavaScript, TypeScript

Frontend: React, [Next.js](#), Tailwind, SCSS/CSS, Redux, Modular CSS

Backend: [Node.js](#), PostgreSQL

DevOps & Tools: Docker, Vite, ESLint, Git/GitHub

Testing: Jest

Experience

Kantherm (June 2024 to September 2024) - 6 Months

I was responsible for restructuring and rebuilding the company website from the ground up.

- Developed the frontend and integrated it with existing backend APIs.
- Designed and implemented custom backend APIs to extend functionality.
- Worked with databases to manage and optimize data flow.
- Redesigned the website's UI/UX to align with modern standards and improve user experience.

Kungsängen (December 2018 to January 2022) - 3 Years, 2 Months.

Salesman / Store Manager – Gothenburg

- Managed daily operations and had full responsibility for the store.
- Ensured compliance with safety regulations and procedures.
- Handled invoices and secured necessary stock and resources for campaigns.
- Managed customer reclamations and resolved issues effectively.
- Coordinated with customers and delivery partners to ensure timely product delivery.
- Achieved recognition as the company's top-performing salesman in my first year.
- Top salesman my first year at the company (sadly no award)
